Merchant benefits

Single source, single integration – Developer-friendly APIs offering end-to-end debit acceptance through all major channels, devices and CVMs

Coverage – Cost-optimized routing supported on all U.S. networks

STAR® Network – We own one of the industry's largest debit networks

Actionable data and insights – Track transaction performance and trends with real-time reporting and analytics

Scale and reliability – Processing 40 percent of all U.S. debit transaction volume across all U.S. debit networks*

Fraud and risk management – Leading machine learning-based tools that can help protect your brand and customers

Debit innovation – Leading team of experts driving payment innovation on real-time debit rails

Economic lift – Managed routing that can lower costs and increase approval rates

Supports debit growth while optimizing routing costs

Partner with the debit expert and industry innovator

We are the only **single-source provider**, at scale, that can accept debit payments from virtually all channels, devices and verification types across the most networks. With nine U.S. network connections, we can support cost-optimized routing on virtually all U.S. networks.

Enabling a frictionless customer experience

In-Store

- PIN POS, PINless POS and Signature Debit routing
- Pay a lower cost, based on networks available on a card
- Compatible with popular POS devices and mobile readers

Online

- Supporting e-commerce, bill payment, recurring and card-on-file
- Customizable routing preferences based on cost, approval rates, liability shift and ticket size
- Patented dynamic-routing algorithm to help optimize every payment and simplify routing complexities

Grow revenue with Authorization Optimization

Coupling Debit Routing and Authorization Optimization helps you maximize online acceptance.

- Help increase overall authorization rates by 4–10%*
- No impact to chargebacks, unlike other providers
- Single integration for all major card brands

Can reduce interchange and switch fee costs up to

40%*

Annual savings for a large rideshare merchant

\$20M*

Expected net new annual revenue for a global tech client

\$99M*
